**Part III DETAILED ACTION**

**Notice to Applicant(s)**

1. This application has been examined. Claims 1-20 are pending.

***Information Disclosure Statement***

2. The references listed in the Information Disclosure Statement dated 6/6/02 have been considered by the Examiner and is attached to this Office Action.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2, 7, 8, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms and phrases "RAW datatype" and "hooking a function in the printer driver" are indefinite and were not defined adequately in the specification.

***Claim Rejections - 35 USC § 102***

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an

Art Unit: 2626

international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1, 3, 4, 5, 6, 9, 10, 11, 12, 14, 15, 16, 17, 18, 19, and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Otala.

With respect to claims 1, 5, 9, 12, 14, and 20, Otala discloses a method for configuring a computer to obtain status information for subsequent print jobs to a printer (column 2, lines 6-11), comprising supplying a proxy printer driver in place of an actual driver associated with the printer (column 2, lines 1-5).

With regard to claims 3, 4, 6, and 19, Otala discloses storing a unique identifier of the computer in a registry (column 3, lines 42-63 and column 5, lines 19-30).

With regard to claim 10, Otala discloses detecting inception of the print job (column 3, lines 33-42).

With regard to claims 11, 15, 16, Otala discloses notifying of the status of the print job (column 5, lines 61-65).

With respect to claim 17, Otala discloses a spooler (column 6, lines 26-60).

With regard to claim 18, Otala discloses a GDI (column 5, lines 3-19).
